DETAILED ACTION

1. Claims 21-24, 27-29, 31, 34, 36 have been cancelled by Applicant.

Claim Rejections - 35 USC § 112

2. The rejections under 35 USC 112, first paragraph, presented in paragraphs 6-7 have been withdrawn in view of Applicant's amendments filed 4/19/2004.

3. The rejections under 35 USC 112, second paragraph, presented in paragraphs 8 have been withdrawn in view of Applicant's amendments filed 4/19/2004.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-20, 25-26, 30, 32-33, 35 are rejected under 35 U.S.C. 103(a) as being obvious over:

DAVIS ET AL (US 6,221,191); or

DAVIS ET AL (US 5,637,366); or

EP 0 782 498 (hereinafter EP '498);

Art Unit: 1773

in view of PETERSEN-HOJ (US 4,405,400).

The DAVIS ET AL references and EP '498 each disclose the recited method of forming the recited multilayer film, wherein the method comprises orienting a polypropylene core layer in a first direction, applying a multilayer cap layer to the oriented core layer, followed by orienting the resulting multilayer film in a second direction, followed by optional metallization; wherein the core layer optionally has the recited tie layers and inorganic minerals; and wherein the multilayer cap layer comprises an amorphous copolyester and the recited first tie layer and optionally the recited second tie layer; and wherein the multilayer core layer and multilayer cap layer is formed by coextrusion. (DAVIS '191, entire document, especially lines 8-39, col. 2; line 25, col. 3 to line 15, col. 5; lines 40-68, col. 5; line 34-68, col. 6) (see corresponding portions of DAVIS ET AL '366 and EP '498)

PETERSEN-HOJ discloses that it is well known in the art to use amorphous PETG copolyesters (lines 28-40, col. 2) to form heat-sealable surface layers for multilayer films.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to use known, commercially available amorphous copolyesters in the cap layer of the DAVIS ET AL references and EP '498 in order to form scalable packaging films. One of ordinary skill in the art would have either omitted silicone from or, alternatively, substituted other known slip or processing aids (claim 33) in the polyester cap layer in order to optimize the film handling and coating characteristics desired for specific manufacturing operations or end uses.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
